Course Title- Introduction to Geology		
Grade Level-11/12	Credits-1	Pre-requisites: lab science
<p>Course Description: Introduction to Geology is a North Country Community College (NCCC) Bridge course which meets high school graduation requirements while earning 4 college credits. This introductory college course is designed to provide a basic understanding of the origin and formation of the earth and the materials that make up the earth. The physical processes involved in the historical and continuing changes to the earth will also be studied. Laboratory and field work will be included as part of the laboratory. This course can be taken for high school credit for no fee. To earn 4 credits through NCCC a \$50 fee is required.</p>
