

WESTPORT CENTRAL SCHOOL DISTRICT

SCHOOL BUS FLEET REPORT FOR FEBRUARY 8, 2018

9 school buses
in our fleet.

On average,
each bus in our
fleet has
provided 5.4
years of service.

On average, our
school buses
have 61,901
miles traveled.

Highest mileage vehicle across our fleet is our twelve year old bus 43 that had approximately 135,000 miles of use at the start of calendar year 2018.

Statewide benchmark for a New York State public school district bus is up to ten years of daily "regular run" service plus up to two more years of "spare" bus service.

It's expected our existing bus fleet will meet the school district's needs next school year. However, a voter proposition associated with purchase of a plow truck to replace the school district's thirteen year old plow truck and purchase of a commercial-sized mower for the school district's athletic fields and playground areas to replace the 25 year old mower is slated for the May 2018 annual vote and election at Westport CSD.
